Author: JENNIFER A. BOWE, STAFF PSYCH

Institution: OTV - OTISVILLE FCI

Inmate Kurti is a 37 year old white male of Albanian descent. He was born and raised in Manhattan but spent a lot of time visiting family in Kosovo. He lived with his grandparents in Kosovo from ages sixteen to eighteen. While in the United States, he reported that he grew up being the victim of beatings, attacks, and robberies that took place in his neighborhood. While visiting and living in Kosovo, he witnessed fighting and was a victim of brutality by the Serbs and police forces. He presented today with the following symptoms: anxiety, poor sleep interrupted with nightmares of what he witnessed in Kosovo, paranoia, an extreme dislike of people walking closely behind him, extreme anger with blackouts and violence, a violent temper, intrusive thoughts of the police brutality that he endured, and hypervigilance. He is irritable, has difficulty concentrating, and has noticed that he has become more forgetful lately. He has a history of violence. He stated that his head has been hit multiple times throughout his development by pipes, etc., and that he has been unconscious many times as a result. He worries that his brain may have been damaged. He is interested in a psychiatric consultation if he can be given a medication that does not have a lot of side effects. Can he be scheduled to see the contract psychiatrist? Thank you.
